

## GUARANTEED ANALYSIS

Total Nitrogen (N)	10.00%
Available Phosphate (P2O5)	0.00%
Soluble Potash (K2O)	8.00%
Sulfur (S)	12.00%
Iron (Fe)	1.00%

Derived from: AMS, Gypsum, Milorganite, and SOP.

## CONDITIONS OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. Seller shall not be responsible for incidental or consequential damages, if any, resulting from a breach of warranty.

## GENERAL INFORMATION

Fall Care is a winterizing fertilizer designed to help lawns store energy in the fall by building a larger root system. This process will help lawns emerge from winter in a healthier condition. Fall Care helps protect the plant against many winter fungal diseases. It is a low-nitrogen formula, excess nitrogen uses up plant energy that is needed to promote growth. Fall Care contains 1% iron.

## DIRECTIONS FOR USE

### Home and Commercial Properties:

For best results apply 6 lb per 1,000 sq ft or 260 lb per acre about mid-September. This will give the lawn time to take in the nutrients and build a larger root system.

### General Campus and Athletic Turf:

Under high use or high wear conditions, apply 250 lb per acre to the general areas before school starts in the fall. Athletic fields used in the fall should be treated after the last game with 7 lb per 1,000 sq ft or 300 lb per acre.
