Mat-Blend[®]

Wood and Paper Mulch

Ingredients:
 Wood fiber content.....60% ± 10%
 Recycled clean paper content.....40% ± 10%
 Basic green dye.....< 1%
 Trade secret.....< 1%

Composition:
 Organic matter (min.).....97%
 Inorganic matter (ash) (max.).....3%
 Moisture content (total weight base).....12% ± 3%
 pH at 3% consistency in water slurry (avg.).....5.7
 Water-holding capacity (min.).....1.2gal./lb.

Mat-Blend Plus[®]

Wood and Paper Mulch with 3% added tackifier

Ingredients:
 Wood fiber content.....60% ± 10%
 Recycled clean paper content.....40% ± 10%
 Tackifier content by weight.....3%
 Basic green dye.....< 1%
 Trade secret.....< 1%

Composition:
 Organic matter (min.).....97%
 Inorganic matter (ash) (max.).....3%
 Moisture content (total weight base).....12% ± 3%
 pH at 3% consistency in water slurry (avg.).....5.7
 Water-holding capacity (min.).....1.2gal./lb.

Where to use Mat-Blend[®]

- Lawn and turf applications, little-to-no slope.
- Where a tight fiber weave helps germination.

Where to use Mat-Blend Plus[®]

- Lawn and turf applications, mild slope.
- Where pumpability is most important.

Packaged in 50 lb. (22.6 kg.) Plastic bags
 Available in palletized 18 bag units. Product certification and MSDS available upon request.

Mat-Blend®

Mat-Blend Plus®

Mat-Blend: Economy, Convenience and Performance

We've combined the economy of clean, recycled newsprint with the powerful performance of Mat-Fiber®, the industry standard for whole wood fiber mulch. The result: Mat-Blend®, an outstanding mulch for a wide range of applications.

Mat-Blend® outperforms ordinary paper mulches because its whole wood fiber component adds holding power and structural integrity. It forms a mat on the soil vastly superior to any straight paper application. Better performance means even better germination, fewer washouts and reduced call backs.

Mat-Blend® provides outstanding performance in the tank, too. Easy mixing, pumping and clean out are important benefits for use in older, smaller or "tired" equipment, or when extensive hose work is required. Mat-Blend® mixes quickly for a homogeneous slurry every time.

You can use Mat-Blend® confidently in any application where you would have considered an all-paper mulch.

When the job calls for mulch with better-than-ordinary performance, use Mat-Blend®.

There's no need for two inventories or blending in the field. Mat-Blend® takes care of this step for you. It's made entirely in the USA and is available from most Mat, Inc. distributors.

Mat-Blend Plus with Added Tackifier

Mat Blend Plus® is a special blend of whole wood fiber and clean recycled newsprint, plus high grade organic tackifier.

You can save yourself both money and trouble with Mat-Blend Plus®. Once you try it, you may never go back to mixing your own tackifier. It is carefully premixed, so you can use Mat-Blend Plus® with confidence and reliability. In fact, tests show that premixed fiber and tackifier combinations are 20-30% more effective than when mixed in the field.

Here are some of the benefits of Mat-Blend Plus®:

It saves you time. Mulch and tackifier are mixed for you.

Better germination and soil protection thanks to bag-to-bag mixture consistency of tackifier.

Eliminate gumballs and fish eyes that often result from in-tank mixture.

Protect workers by eliminating irritating tackifier dust clouds and slippery work surfaces.
