

A Balanced Horse Pasture Formula

Creates a high-yielding, versatile pasture suitable for a wide range of growing conditions.

High quality pasture remains throughout the entire growing season. Excellent for all breeds of horses as well as other livestock.

Seed Mix

20% Sweet Tart Festulolium	10% Kentucky Bluegrass
25% Climax Timothy	10% Creeping Rooted Alfalfa
10% Bestfor Tetraploid Ryegrass	10% White Ladino Clover
10% Meadow Brome	5% Potomac Orchardgrass

Sweet Tart Festulolium

A very palatable grass that is high in energy and nutritional value. Festulolium is a cross between meadow fescue and perennial ryegrass. This cross captures the high palatability and forage quality identified with perennial ryegrass but also improves winter-hardiness and consistent summer growth of the meadow fescue. Sweet Tart festulolium will be the first grass eaten in the pasture and will provide improved digestion, protein, and minerals.

Climax Timothy

Climax Timothy is later starting, but yields best in the spring as well as later in the season.

Bestfor Tetraploid Ryegrass

High palatability, fast establishment, high yielding forage grass that allows for earlier use of the pasture.

Meadow Brome

Meadow Brome is for mid-season pasture when early grasses have lost their vigor. Has excellent persistence.

Kentucky Bluegrass

Excellent early and late-season pasture, very persistent, high palatability, takes continuous pasturing, and takes the wear of high traffic.

Creeping Rooted Alfalfa

Creeping Rooted Alfalfa provides a high protein and energy source. Excellent persistence in mid-summer that lasts longer than tap root varieties.

White Ladino Clover

White Ladino Clover is the most palatable of the clovers. It is a high protein food source that is persistent and easy to establish.

Potomac Orchardgrass

Potomac Orchardgrass is a high yielding grass developed for livestock production. It has good seedling vigor and recovers quickly after cutting or grazing.

**Recommended Seeding Rate**

20-25 lbs per acre for the best results.

Bag Size: 25 lbs
