ProDeuce® herbicide contains proflaminate and glyphosate.

## Cut Back on Labor with ProDeuce®

Dual-action ProDeuce® herbicide combines proflaminate and glyphosate, two of the most trusted turf and lawn-care solutions, into one convenient formulation. ProDeuce is the perfect solution for landscape managers and lawn care operators seeking to eliminate nuisance weeds from weed-prone areas throughout the season.

Application to cracks and crevices, along fences and foundations, around and within mulched beds of well established plants, and throughout gravel areas eliminates existing weeds and prevents the growth of many others. One application is often all you need; ProDeuce reduces the cost and damage associated with mechanical trimmers and decreases labor inputs.

## LABELED USES

On cracks and crevices in driveways, sidewalks, walkways and patios  
 Along fences, foundations, curbs, retaining walls and edges of lawns  
 Around the base or in mulched beds of well-established (at least 6 months old) plants, shrubs or trees  
 On gravel areas

## Application Recommendations

### FOR BEST RESULTS

Apply 3 to 6 fl oz per gal of water per 1,000 square feet. Use 3 oz rate for 3 to 6 months control of the weeds listed in the pre-emergent section of the label.

ProDeuce is a non-selective herbicide. Do not use ProDeuce on desirable plants, in lawns or for lawn renovations, in or around fruit or vegetables, around young plants or in an area that will be planted or seeded for four to six months.

ProDeuce may cause temporary staining on certain hard surfaces such as concrete and brick. Do not apply to areas where staining is unacceptable.

FOR SPECIFIC APPLICATION RATES, DIRECTIONS, MIXING INSTRUCTIONS AND PRECAUTIONS, READ THE PRODUCT LABEL.
