

TWCA/WaterGuard

featuring

TWCA - The Turfgrass Water Conservation Alliance has qualified varieties through rigorous testing protocols that have proven to maintain green cover using less water than other varieties. Minimum of 40% water savings!

PURPOSE

- Define drought tolerance
- Set testing protocol
- Identify plants that use at least 40% less water
- Promote these cultivars
- Educate consumers and public agencies

RESEARCH PARTNERS

- Nexgen Turf Research
- University of Arkansas
- Purdue University
- Virginia Tech University
- Langlois Turf Consultants (NJ)
